1/2 April
20/21 May
16/17 June

Please note that we can only accept 8 people on this course so places will be allocated on a first come first serve basis.

Course details:

The purpose of this seminar is to involve the participant in the restoration of both anterior and posterior teeth, using the principles of occlusion **without changing the vertical dimension of occlusion** in the process.

Course description

You will need two patients for this seminar; one requiring between four and six units of anterior fixed restorative dentistry, and one requiring three or four units of fixed restorative dentistry in the same posterior quadrant, either on implants or natural teeth. Both requirements can be found on the same patient as long as additional extensive restorative dentistry is not needed in other portions of their mouth. All endo, perio, ortho and TMJ treatment and implant procedures must have been completed well in advance of Session 1. By the first session, both patients should have been equilibrated to a neuromuscular release and have a functional centric relation appliance (of any design you choose) and an anterior deprogrammer. Please bring two sets of unmounted study casts for each patient, poured in die stone and properly trimmed. You will also need to bring:

- Medical and Dental history
- Occlusal / TMD screening
- Full periodontal chart
- Complete dental charting
- Full mouth x-rays
- Any relevant photographs (if possible)
- Patient details to be on a power-point presentation / memory stick if possible.

We can place the implants or show you how to restore.

To register please complete the tear off slip below and return with a cheque for the course fee to: Mari Rendall, South Coast Dental Specialists, Avenue House, South Walks Road, Dorchester, DT1 1DT or email Mari for BACS details.
